Preliminary: For Work Group Resource Action Number	Interest Addressed	Description of Proposed Resource Action	Local or Tourist Priority	Flow Related	Construction	O&M (1=one time, 0=ongoing)	Environ. Documention	Potential X. Resource Impact	Potential User Conflict	Acquisition /Easement	Revenue Generating	Consistent w/existing zoning/regs	Change experience/ expectation	Comments
LWG-1	land use	Increase communication on issues relating to present DWR land usage around the lake area so it shifts from unused to recreational or appropriate public use. (LUE3) (I am not clear what this means.)												
LWG-2	land use	Preservation of open/natural areas/greenbelts (LUE7) Goal Statement. Actions could include: 1) Develop a program to evaluate future development proposals within the Project Area to ensure preservation and protection of open space when possible. 2) Require greenbelt areas as component of any new development within the Project Area. 3) Develop a Native Vegetation Management Program.											·	
LWG-3	land management	Dump areas used by DWR need to be removed. (AE5) Areas currently utilized by DWR to dispose of construction debris or maintenance refuse located at will either be screened from general public view using a combination of fencing and vegetation as appropriate OR if the site is no longer used, a restoration plan will be developed to remove the existing debris if necessary or cap as appropriate. Railroad trestle and construction debris will be removed from the Feather River including sites below the Fish Barrier dam, below the Table Mountain Bridge, and below the Hwy 70 Bridge in accordance with required permits.												
LWG-4	land management	Potential for acquisition of federal lands (BLM and USFS) within project boundary by DWR. (LUE9) Complete the studies required and convey BLM lands totaling approximately 7,000 acres to DPR through the Recreation and Public Purposes Act (R&PP).									,		-	
LWG-5	land use	Potential for DWR to sell, for private development, some lands currently held by the State. This would get the lands back on tax rolls. (LUE10) Develop a program to identify excess lands held by the State and to offer these lands for sale.												
LWG-6	land management	Use site specific, integrated pest management approach to control forest pests, employing mechanical, cultural, biological, and/or chemical methods based on effectiveness, cost-efficiency, and protection of human health and environmental quality (LME12) (This is really a strategy that you would follow while actually doing some resource action)												

**Draft: for Discussion Only**

Preliminary: For Work Group			rist		_		_		_					
Resource Action Number	Interest Addressed	Description of Proposed Resource Action	Local or Tourist Priority	Flow Related	Construction	O&M (1=one time, 0=ongoing)	Environ. Documention	Potential X- Resource Impact	Potential User Conflict	Acquisition /Easement	Revenue Generating	Consistent w/existing zoning/regs	Change experience/ expectation	Comments
LWG-7	land management	Provide an emergency boat for CDF (LME16) (I don't know much about boats for CDF - What type do they need? Where do they need to keep it?)												
LWG-8	Aesthetics	Establish debris collection program on regular schedule (AE1)Combined with LWG-10, the resource action is: Establish regular, routine debris collection program for public access areas, shorelines and camping areas using County prisoner release program to augment budget for the program.												
LWG-9	Aesthetics	Remove old railroad trestle and other debris from river.				:								
LWG-10	Aesthetics	Clean up shoreline, particularly adjacent to camping and public access areas. Use county prisoner-release programs, if necessary, to maintain clean shorelines. (AE3)SEE LWG-8												
LWG-11	Aesthetics	Remove concrete and construction debris in Feather River including below the Fish Barrier dam, below the Table Mountain Bridge, below the Hwy 70 Bridge. (AE4)SEE LWG-3			,		-							
LWG-12	Aesthetics	Dump areas used by DWR need to be removed. (AE5)SEE LWG-3												
LWG-13	Aesthetics	Camouflage the power line towers (AE7)Paint the power towers within the project boundary complementary colors such as brown and green so as to better blend into their surroundings and lessen the visual impact of metal towers.												
LWG-14	Aesthetics/ land management	Expand use of 'low impact' signs (AE9) I am not sure what 'low impact' is referring to, the sign or the area?												
LWG-15	Aesthetics	Native plant landscaping (potential sites: Feather River fish Hatchery, State Parks Headquarters, DWR Field Office, Spillway Launch Facility - future) and restoration of native plant communities. (AE12) Develop a Native Plant Management Plan that includes development and restoration of native plant communities around project facilities including the Feather River Fish Hatchery, State Parks Headquarters/Oroville Field Division, Spillway Launch facility.
